

Q&A Report:

2019 CRCC Fall Series - Educator Orientation & Training

Question Asked	Answer Given
If I want to do the finals, but I do not have a 2 hour window at one time could I still get my kids to participate? Or does it have to be a block of 2 hours set aside?	It has to be in one two hour block. Important points. 1) Students can be in different classes/locations 2) You can run this at any time of the day or night on any day of the week 3) this will be in Late november so hopefully you will be able to schedule this somehow.
Is there one window for the in school finals even though our school will have separate classes, so all students participating in the finals will need to have their own computer to participate. Is that correct?	Correct - we have only one school finals. Maybe in the future we can expand the functionality, but the objective is to create school spirit!
Does student bootcamp progress count toward competition scores?	No Bootcamp focuses on participation and inclusiveness, but the score is not carried forward.
Is there a certain number of missions a student must complete to aid their school?	There is no specific number- the score is based on percentage missions completed so the more missions completed, the more that helps the school.
I missed the webinar last week. Is there a link to watch it?	You can find the link at https://gocoderz.com/crcc-usa-fall-2019/
Is it possible to batch register my students with an csv file?	This is not a feature we support right now. Good idea though. We will pass to dev for next season
Will all schools that have signed up receive a packet in the mail? When is it expected for those to arrive?	The packages are in printing right now - each school will receive one and we will send out a notice when they are ready and in the mail.
Thank you!	
What changes touch back to false after each iteration	As soon as the robot turns, the sensor is no longer pressed and the status changes to False.
What age groups are able to participate?	Middle School
If kids participated last year, will they be penalized for skipping those missions this year?	Bootcamp practice missions will not effect their total score, but once the competition phase and qualifiers phase start, all missions count and skipping them will reduce the total score and the percentage of missions solved for the school. So students should do as many missions as possible even the easy ones.
When a student goes to sign up and they are under the age of 13, does an automatic message pop up that their parents have to sign them up?	YES - very important and we do comply with the COPPA and FERPA requirements of course.
